

Murilo Biss

Senior Data Engineer · Analytics Engineering · Python

Brazil +55 (41) 99835-8844 murilobiss@gmail.com linkedin.com/in/murilobiss github.com/murilobiss

PROFESSIONAL PROFILE

Data Engineer and Analytics Engineer with 7+ years of experience turning operational and business data into reliable, scalable analytics. Strong SQL practice, cloud platforms (AWS, Azure, GCP), and production ETL/ELT design. 5+ years hands-on with **Databricks**, **Snowflake**, and Spark (PySpark); 3+ years with Azure Data Factory. **AWS Certified Cloud Practitioner**; Apache Airflow certified (Astronomer); practical experience with data lake and data warehouse architectures. Fluent delivery in Python, SQL, dbt, Spark, Snowflake, and Databricks, with emphasis on performance, observability, and maintainable pipelines.

Comfortable translating business rules into data models, collaborating in Agile Scrum teams, and communicating results to technical and non-technical stakeholders. Driven by automation, clear metrics, and measurable impact.

CORE COMPETENCIES

Cloud & warehouse

Snowflake (warehousing, tasks, sharing); AWS (S3, Glue, Redshift, Athena); Azure (Databricks, Data Factory, DevOps); GCP (BigQuery)

BI & analytics

Power BI, Looker, visualization, metric-driven decisions

Data & orchestration

PySpark, Kafka, Delta Lake; **Snowflake + dbt** in production; Airflow; CI/CD (Azure DevOps); observability

Delivery

Agile Scrum, cross-functional work, requirements analysis, solution architecture, project leadership

PROFESSIONAL EXPERIENCE

Senior Data Engineer — Tarmac.IO

May 2025 — Present

Brazil

Embedded — logistics. Supply chain and logistics data platform: real-time inventory, route optimization, material lifecycle. Medallion architecture (Bronze / Silver / Gold), modern ELT, scalable data products for operations and BI.

Embedded — healthcare. Workforce and compensation analytics on Databricks Lakehouse; Delta Live Tables; data quality, lineage, and governance. Infrastructure automation, orchestration, and performance tuning with Terraform and cloud-native tooling.

- Lead data engineering for internal tools and customer-facing products: Python, SQL, dbt, Spark.
- Migrate legacy systems to Snowflake and Databricks; scalable models for analytics and reporting.
- Partner with product and engineering; automated monitoring and retries for scheduled jobs and notifications.
- Agile ceremonies and sprint planning with global teams; AWS and Terraform for provisioning and automation.

Data Engineer — AB InBev

Aug 2023 — May 2025

The Loop Hub. Centralized platform for global sales, marketing, and operations: standardized KPIs and decisions. Lakehouse on Databricks and Snowflake; scalable models and near real-time analytics. Factory-style ETL pattern for modular, reusable pipelines across domains.

- Requirements analysis, business rules, and structures for a unified analytics environment.
- ETL in Databricks and Snowflake; Spark integrations; Azure Data Factory and Azure DevOps for reliability.
- Agile Scrum with multidisciplinary teams; clear communication of results and blockers.

Data Engineer — Banco Bari

Jan 2022 — Sep 2023

Curitiba, PR

Modern banking analytics platform: internal and external financial sources on AWS (S3, Glue, Athena, Redshift). ETL for scalable processing, reliable ingestion, and performance on large datasets; improved accessibility for financial and operational teams.

- ETL with AWS (S3, Athena, EC2, EKS, ECR, Redshift, Glue); advanced SQL.
- Apache Airflow DAGs for reliability and observability; Agile planning and delivery.

Senior Data Analyst — Banco Bari

Dec 2020 — Dec 2021

Curitiba, PR

- Dashboards and KPIs for business units; Power BI, SQL, AWS Athena, Power Query M, Python.
- Exploratory analysis, metric definition for objectives, and stronger data culture across areas.

Project Analyst — Banco Bari

Aug 2019 — Dec 2020

Curitiba and region, Brazil

- Outsourcing and IT projects: scope, budget, planning, risk, status reporting, and contractual compliance.
- Phases, estimates, supplier payments, negotiations, and third-party contracts.

Process Analyst — Groupe Renault (Segula Technologies)

Mar 2019 — Aug 2019

Curitiba, Paraná

- Project financial control (investments vs expenses); CAPEX/OPEX on vehicle capacity programs (large financial volumes).
- Stakeholder coordination, budgets aligned to strategy, and reporting to management.

Project Analyst — Bradesco Seguros

Aug 2016 — Aug 2018

Curitiba and region, Brazil

- BIA — Business Intelligence Analytics (social security): MS Project, reduced delivery timeline, milestone reporting.
- Risk management, integrated testing, partnerships with business areas, process definition support.

Process Analyst — HSBC

May 2014 — Aug 2016

Curitiba and region, Brazil

- Process improvement, root-cause analysis, tools for control and management, SLA compliance.
- Benchmarks, process documentation to standards.

CERTIFICATIONS

- AWS Certified Cloud Practitioner
- Astronomer Certification — Apache Airflow Fundamentals
- Fullstack Labs Certified — Data Engineer

EDUCATION

- **FIAP** — Postgraduate (lato sensu), Software Engineering (Mar 2025 — Aug 2026)
- **Pontifícia Universidade Católica do Paraná (PUCPR)** — Production Engineering (2011 — 2015)
- **Universidade Tecnológica Federal do Paraná (UTFPR)** — Civil Engineering (2007 — 2012)

LANGUAGES

- English — native or bilingual proficiency
- Portuguese — native or bilingual proficiency
- Spanish — limited working proficiency
